

Clinical Waste Disposal Policy

When dealing with clinical waste staff should wear the appropriate protective clothing at all times.

Clinical waste is anything disposable which has been in contact with body fluids, e.g. used nappies, wipes, disposable roll etc. Gloves and aprons should be worn by staff as a barrier from clinical waste.

All clinical waste and personal protective equipment which has been in contact with body fluids must be appropriately disposed of. Nappies must be placed in a bag then placed into the nappy bins provided.

Clinical waste must never be put into the domestic waste bins. We have a paid collection service.
